# GLIDDEN GETS YOU GOING<sup>®</sup> ON THE EXTERIOR OF YOUR HOME

Our Glidden™ color experts have formulated color schemes to assist you in creating a look for your house that will reflect your style and accent your home's unique features. Each grouping on our color card consists of one large and three small color blocks. White may also be introduced into any scheme to add versatility.

Once you have selected a scheme that you like, the colors can be used in a variety of combinations. Shown here, you can see the same scheme applied to the same house in different ways to produce very different visual effects.

## Use the same color scheme in different ways to achieve a variety of effects.

Highlight decorative elements such as shutters, brackets, front entrances and lovely details to place a focus on attractive qualities of your home. Conceal downspouts, vents, wires and unsightly elements by painting them into the body or trim.

Using light colors on a structure portrays a soft and airy charm; dark colors add drama and visual impact to an exterior.

Establish a unified appearance by painting the body and trim with one color. The result will create an elegant expression.

- Coordinate the colors of existing elements of your exterior.
- Roofing, brick and stone will provide cues to creating a perfect scheme.
- To add character and interest to your home, consider using a color scheme which will enhance architectural features.
- Extend the color scheme of your home to landscaping. Garden elements, foliage and flowers add texture and color to the complete visual impact of your home.
- Consider the style and color of homes in your neighborhood. Strive to create harmony. Use warm colors next to cool; light or medium tones next to dark.

# QUALITY THAT GUARANTEES YOUR SATISFACTION

GUARANTEED RESULTS

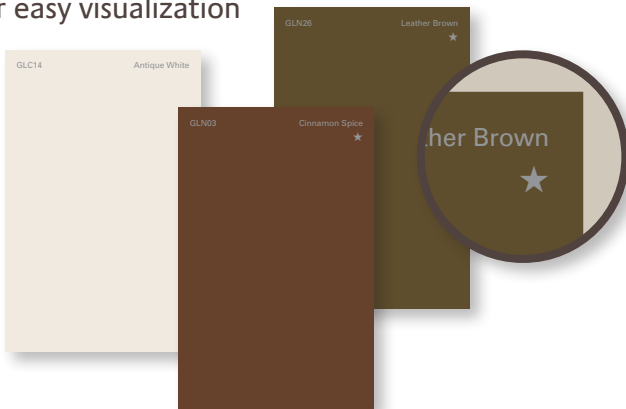

Glidden™ Exterior Paints are specially formulated to resist fading and protect against damaging UV rays and severe weather conditions. These paints also provide a mildew-resistant coating that keeps the outside of your home looking great for years.

- Superior adhesion, even on bare wood and metal
- Resistant to blistering
- Spatter-resistant formula keeps paint on the roller, not you

## GLIDDEN™ PAINTS MAKE COLOR SELECTION EASY

Oversize Chips for easy visualization

In addition to the 15 color schemes inside this brochure, you can coordinate more colors by matching the symbols on the corner of the color chips.
